PROFESSIONAL SUMMARY

Associate Software Engineer with 1+ year of experience at Tech Mahindra working on Meta platforms including Facebook, Instagram, WhatsApp, Threads, and Messenger. Skilled in MERN stack development, REST APIs, JavaScript, React.js, Node.js, and MongoDB with hands-on experience in frontend development, backend integration, localization validation, and software testing. Experienced in building scalable full-stack applications, implementing responsive user interfaces, and collaborating in Agile development environments.

WORK EXPERIENCE

Associate Software Engineer | Tech Mahindra Ltd.

Jan 2025 – Present

- **Client:** Meta Platforms (Facebook, Instagram, Threads, Messenger, WhatsApp)

1. Localization Engineering Team (Meta)

- Collaborated with cross-functional engineering teams to validate and improve multilingual user experiences across Meta platforms.
- Verified and maintained localization quality for 5,000+ strings across 30+ languages.
- Automated text validation processes using Java, improving testing efficiency by 15%.
- Tracked and resolved 200+ localization and UI-related issues before production release.

2. Facebook Marketplace Team

- Collaborated with frontend teams to validate and improve React.js-based Marketplace features across multiple environments.
- Analyzed and resolved UI and functional issues across alpha, beta, and production systems.
- Supported large-scale Marketplace platform reliability used by millions of daily active users.
- Verified AI-generated product recommendations and personalized product discovery workflows based on user prompts and behavior.
- Improved user experience by analyzing AI recommendation accuracy and UI interactions.

SKILLS

Technical Skills

- **Frontend:** HTML, CSS, Bootstrap, React.js, Redux, Tailwind CSS
- **Backend:** Node.js, Express.js, Spring Boot
- **Programming:** JavaScript, Java, Python, SQL
- **Databases:** MongoDB, MySQL, Oracle
- **Tools:** Git, Eclipse, VS Code, Postman
- **Concepts:** Data Structures & Algorithms, REST APIs, CRUD Operations, API Integration, Agile

Soft Skills

- Teamwork, Analytical Thinking, Communication, Deadline Management

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

2020 - 2024

- Vishnu Institute of Technology, Bhimavaram, AP
- **CGPA: 8.92**

Intermediate (Maths Physics Chemistry)

2018 - 2020

- Sasi Junior College, Velivenu, AP
- **Marks: 970/1000**

Secondary School Certificate (SSC)

2017 - 2018

- Little Flower Public School, Ravulapalem, AP
- **CGPA: 10.0**

PROJECTS

Smart TaskHub — AI-Powered Productivity & Task Management System (MERN Stack)

- **Tech Stack:** *MongoDB, Express.js, React.js, Node.js, JWT, Redux, Socket.io, Tailwind CSS*
- Developed a full-stack task management web app that enables users to create, assign, and track tasks with real-time collaboration.
- Efficiently handled over 1,000 task records with smooth performance and real-time updates.
- Built JWT-based authentication, reducing unauthorized access risks by over 90%.
- Integrated AI-based task prioritization, improving average user productivity by 25% (based on internal test cases).
- Designed REST APIs for user and project management, optimized for less than 200ms response time.

Multi Search Engine — Multi-Platform Smart Search (Machine Learning & NLP)

- **Tech Stack:** *Python, Flask, BeautifulSoup, HTML, CSS, JavaScript*
- Built a cross-platform search engine integrating 8 platforms (Google, YouTube, Twitter, Weather App, Maps, Spotify, News, Movie Details).
- Implemented ML-based result ranking, improving result accuracy by 30% compared to default APIs.
- Reduced average query response time from 3s to 1.8s using asynchronous API calls.
- Won 1st Place at Prajwalan Hackathon 2023 among 50+ competing teams.

Language Detection System — NLP Text Classification

- **Tech Stack:** *Python, Scikit-learn, Pandas, Flask*
- Designed and trained a language identification model to detect the language of given text documents automatically.
- Trained a text classification model on 50,000+ multilingual samples using TF-IDF and Naive Bayes.
- Achieved 94% detection accuracy across 20+ languages.
- Deployed model via Flask API, supporting real-time detection in less than 1 second per request.

INTERNSHIPS

Java Full Stack Internship — KodNest

- Acquired hands-on experience in full-stack web development using Java.

MERN Stack Internship — 10k Coders

- Acquired hands-on experience in MERN stack web development using React.js, Node.js, Express.js

CERTIFICATIONS

- | | |
|---|--|
| • MERN Stack by 10K Coders | • Introduction to Cybersecurity — Palo Alto Networks |
| • Pandas — Kaggle Course Completed | • Introduction to Data Science — Cisco Learning |
| • Data Visualization — Kaggle Achievement | • Python — Kaggle Credential Earned |

ACHIEVEMENTS

- Winner — Prajwalan Hackathon 2023, SRKR Engineering College
- Bravo Award — Recognized by Tech Mahindra for contributions to Meta projects
- Pat on Back Award — Awarded by Tech Mahindra for consistent performance and quality contribution

HOBBIES

- Sketching | Creating Crafts from Recycled Materials | Web Surfing | Sports | Helping People
